Quantum sensing with boron nitride nanopowders

Wednesday 14 December 2022 15:15 (15 minutes)

Validating the use of hexagonal boron nitride (hBN) nanopowders as a simple, cost-effective solution for quantum sensing applications. Demonstrating sensing of paramagnetic ions using hBN nanopowder and further exploring its magnetic sensing capabilities by preparing thin films of controlled thickness.

Author: Ms SINGH, Priya (School of Science, RMIT University, Melbourne, VIC 3001, Australia)

Co-authors: Mr HEALEY, Alex. J. (School of Physics, University of Melbourne, VIC 3010, Australia); Dr MENESES, Fernando (School of Physics, University of Melbourne, VIC 3010, Australia); Mr ABE, H (National Institutes for Quantum Science and Technology (QST), 1233 Watanuki, Takasaki, Gunma 370-1292, Japan); Dr AHARONOVICH, I. (School of Mathematical and Physical Sciences, University of Technology Sydney, Ultimo, NSW 2007, Australia); Mr ROBERTSON, Islay. O. (School of Science, RMIT University, Melbourne, VIC 3001, Australia); Dr TETIENNE, Jean-Philippe (School of Science, RMIT University, Melbourne, VIC 3001, Australia); Mr KIANINIA, M. (School of Mathematical and Physical Sciences, University of Technology Sydney, Ultimo, NSW 2007, Australia); Dr REINECK, Philipp (School of Science, RMIT University, Melbourne, VIC 3001, Australia); Mr STYLES, Roy (School of Science, RMIT University, Melbourne, VIC 3001, Australia); Mr SCHOLTEN, Sam. C. (School of Physics, University of Melbourne, VIC 3010, Australia); Mr OHSHIMA, T (National Institutes for Quantum Science and Technology (QST), 1233 Watanuki, Takasaki, Gunma 370-1292, Japan)

Presenter: Ms SINGH, Priya (School of Science, RMIT University, Melbourne, VIC 3001, Australia)

Session Classification: Conference on Optoelectronic and Microelectronic Materials and Devices

Track Classification: COMMAD: COMMAD: Nanoelectronic and nanophotonics
