New frontiers in smart sensor technology for a healthier, safer and sustainable future

Monday 12 December 2022 11:00 (30 minutes)

Recent advances in device physics, nanotechnology, AI, and sensor fusion is leading to a revolution in smart sensor technology to provide multi-faceted interfaces to the three-dimensional physical, chemical, and data environment, enabling high-performance information gathering and real-time situational awareness.

Primary author: Prof. EGGLETON, Benjamin (The University of Sydney Nano Institute)

Presenter: Prof. EGGLETON, Benjamin (The University of Sydney Nano Institute)

Session Classification: Australian and New Zealand Conference on Optics and Photonics

Track Classification: ANZCOP: ANZCOP: Optical sensors
