24th Australian Institute of Physics Congress

Contribution ID: 271 Type: Invited talk

Two-dimensional materials for next-generation electronics, optoelectronics and antipathogenic coatings

Wednesday 14 December 2022 14:00 (30 minutes)

Atomically-thin materials possess unique intrinsic properties and are amenable to a range of tuning techniques. We harness these properties underpinned by application demand and work with industry to translate into end-user products.

Primary author: WALIA, Sumeet (RMIT University)

Presenter: WALIA, Sumeet (RMIT University)

Session Classification: Conference on Optoelectronic and Microelectronic Materials and Devices

Track Classification: COMMAD: Emerging materials: 2D, oxide, organic, and perovskite materials
