Stability and Scaling Behaviour of Magnetic Skyrmions in Cu_2OSeO_3

Monday 12 December 2022 14:30 (30 minutes)

The data provide new aspects about the scaling behavior of the skyrmion and helical distances. This offers new valuable information on the parameters in the spin Hamiltonian, which are responsible for the formation of the fascinating quantum protected objects.

Author: ULRICH, Clemens (The University of New South Wales)

Co-authors: GILBERT, E. P. (Australian Centre for Neutron Scattering); PERVEZ, F. (UNSW Sydney); SAUCEDA FLORES, J. A. (UNSW Sydney); O'BRIEN, J. (UNSW Sydney); VELLA, J. (University of Auckland); SPASOVSKI, M. (University of Auckland); ROV, R. (University of Auckland); YICK, S. (UNSW Sydney); SOEHNEL, T. (University of Auckland)

Presenter: ULRICH, Clemens (The University of New South Wales)

Session Classification: Focus Session

Track Classification: Focused Sessions: Unveiling emergent physics of novel functional materials with neutron scattering
