## Condensed Matter Physics in Big Time Crystals

*Thursday 15 December 2022 16:00 (30 minutes)*

We report the application of big discrete time crystals created by a Bose-Einstein condensate of ultracold atoms bouncing on an oscillating mirror to the investigation of condensed matter phenomena in the time dimension.

**Primary author:** HANNAFORD, Peter (Swinburne University of Technology)

**Co-authors:** ZAHEER, Ali (Swinburne University of Technology); SIDOROV, Andrei (Swinburne University of Technology); SINGH, Arpana (Swinburne University of Technology); GUNAWARDANA, Chamali (Swinburne University of Technology); GIERGEL, Krzysztof (Swinburne University of Technology); SACHA, Krzysztof (Jagiellonian University); TOJO, Satoshi (Swinburne University of Technology); TRAN, Tien (Swinburne University of Technology)

**Presenter:** HANNAFORD, Peter (Swinburne University of Technology)

**Session Classification:** Focus Session

**Track Classification:** Focused Sessions: Time Crystals
