Record-breaking performance of low-dimensional solid photodetectors –Commentary

Thursday 15 December 2022 11:00 (30 minutes)

The purpose of this paper is to point out these unreliable photodetector parameters noted by the author and to try to draw attention to the obvious physical limitations of photodetectors that are sometimes overlooked in estimating photodetector performance.

Author: Prof. ROGALSKI, Antoni (Military University of Technology)

Presenter: Prof. ROGALSKI, Antoni (Military University of Technology)

Session Classification: Conference on Optoelectronic and Microelectronic Materials and Devices

Track Classification: COMMAD: COMMAD: Photonic integrated circuits, semiconductor lasers, LEDs, photodetectors, and modulators
