

XV Black Holes Workshop

Tuesday 20 December 2022

Session 5: chaired by J. Rocha - Auditório J. J. Laginha (09:00 - 10:30)

time	[id] title	presenter
09:00	[125] R. Brito: Floating orbits, superradiant scattering and the black-hole bomb: 50 years after	
09:15	[126] E. Radu: Curing conical singularities with scalar hair	
09:30	[127] R. Vicente: First constraints on binary black hole environments from LIGO-Virgo observations	
09:45	[128] E. Gasperín: The GBU system close to spatial infinity: a log story	
10:00	[129] E. Giangrandi: Stability and gravitational collapse of dark matter admixed neutron stars	
10:15	[130] R. Mishra: Radiative GRMHD simulations of black hole accretion with KORAL
