

CI Update

25/02/2022

NEG property

CapaciTorr® Z 1000
sorption test (according to ASTM F798-97)

Typical Pump Characteristics

| Typical Pump Characteristics | | CapaciTorr Z 1000 |
|-----------------------------------|------------------|-------------------|
| Alloy Type | | ZAO |
| Alloy Composition | | Zr V Ti Al |
| Getter Mass (g) | | 280 |
| Getter Surface (cm ²) | | 1530 |
| Activation Power (W) | | 190 |
| Pumping Speed (l/s) | H ₂ | 1250 |
| | H ₂ O | 900 |
| | N ₂ | 360 |
| | CO | 550 |
| Sorption Capacity (Torr·l) | H ₂ | 5600 |
| | H ₂ O | 70 |
| | N ₂ | 1.7 |
| | CO | 3.5 |

Saturation Estimates

$$t_{saturation} = \frac{\text{Sorption capacity}}{\text{Pumping speed} \times \Delta\text{Pressure}}$$

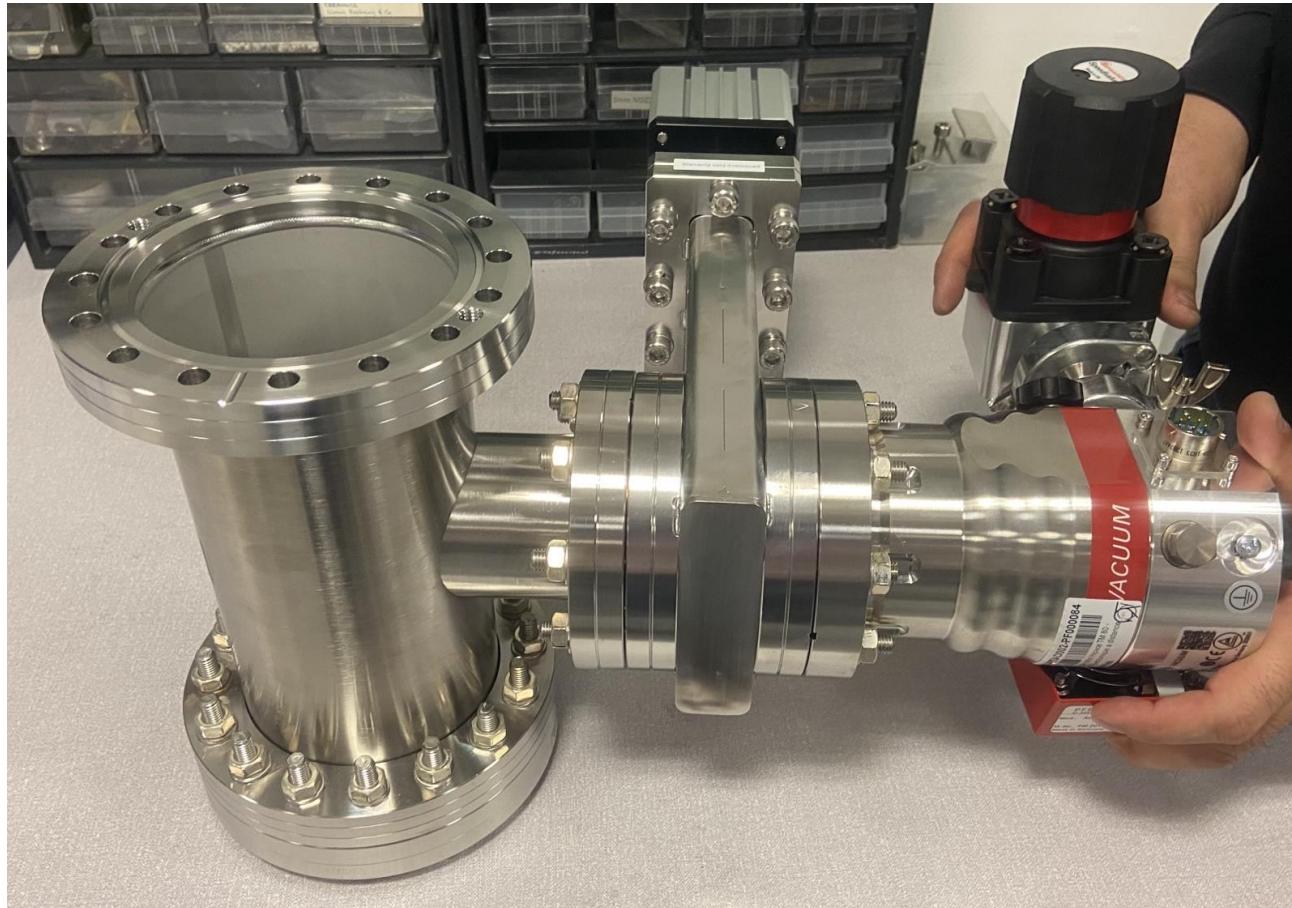

Where $\Delta\text{Pressure} = P_{\text{Jet on}} - P_{\text{Jet off}}$

Sorption capacity
= 2.26mbar L

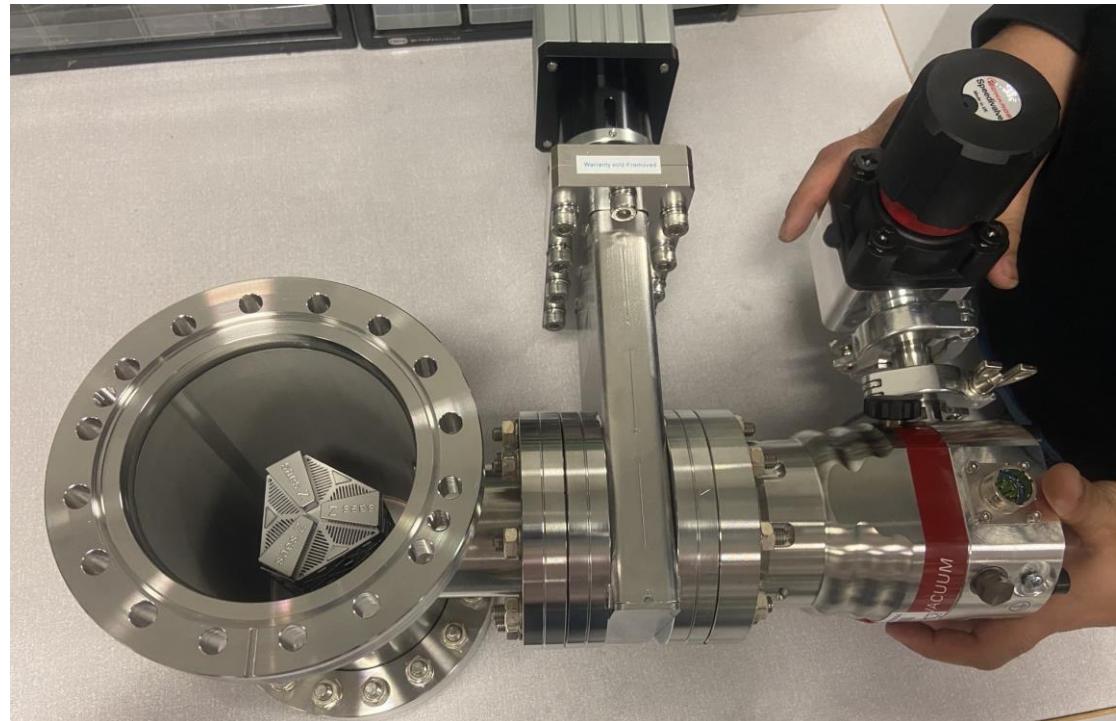

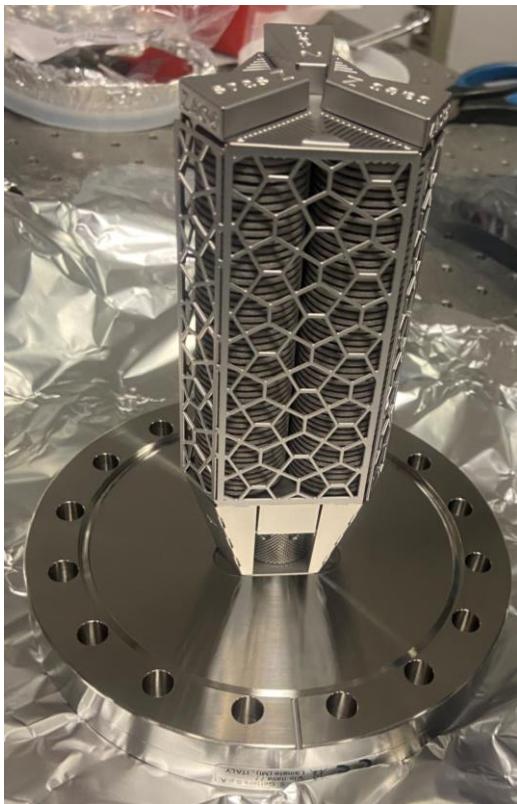

Pumping speed
= 360 L/s

| Skimmer | Chamber | ΔP | Saturation time |
|---------|-------------|------------|-----------------|
| 0.7x9mm | Interaction | 9.45E-09 | 7.7 days |
| 0.3x9mm | Interaction | 3.50E-09 | 20.8 days |
| 0.7x9mm | Dump | 9.50E-08 | 18.4 hours |
| 0.3x9mm | Dump | 4.36E-08 | 40.0 hours |

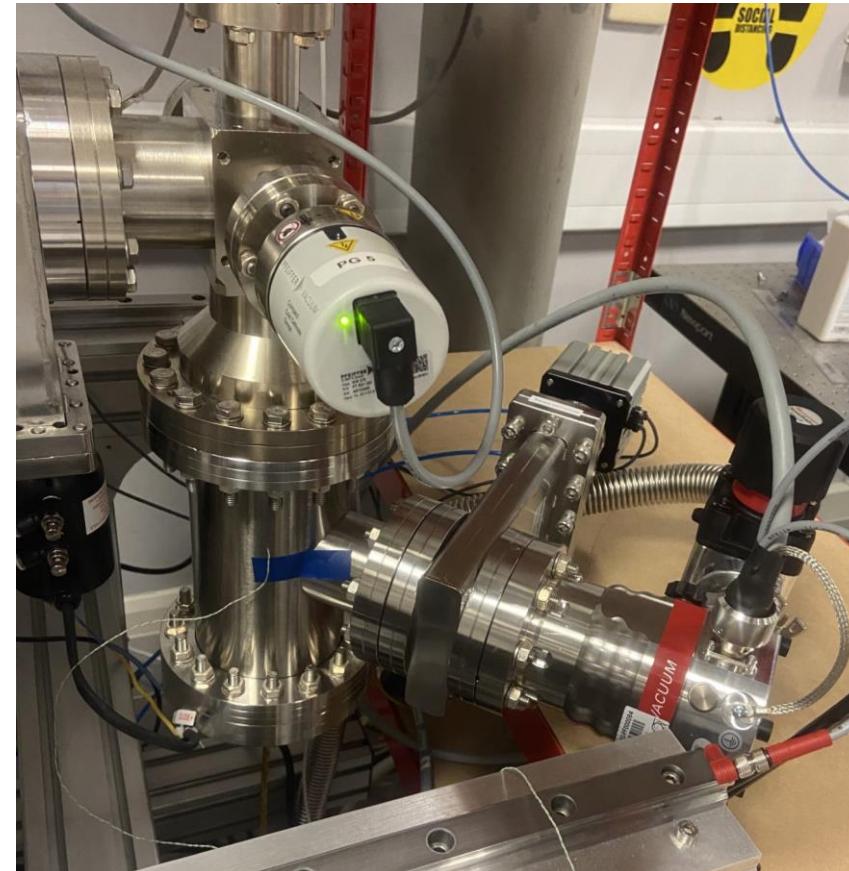

NEG subsystem

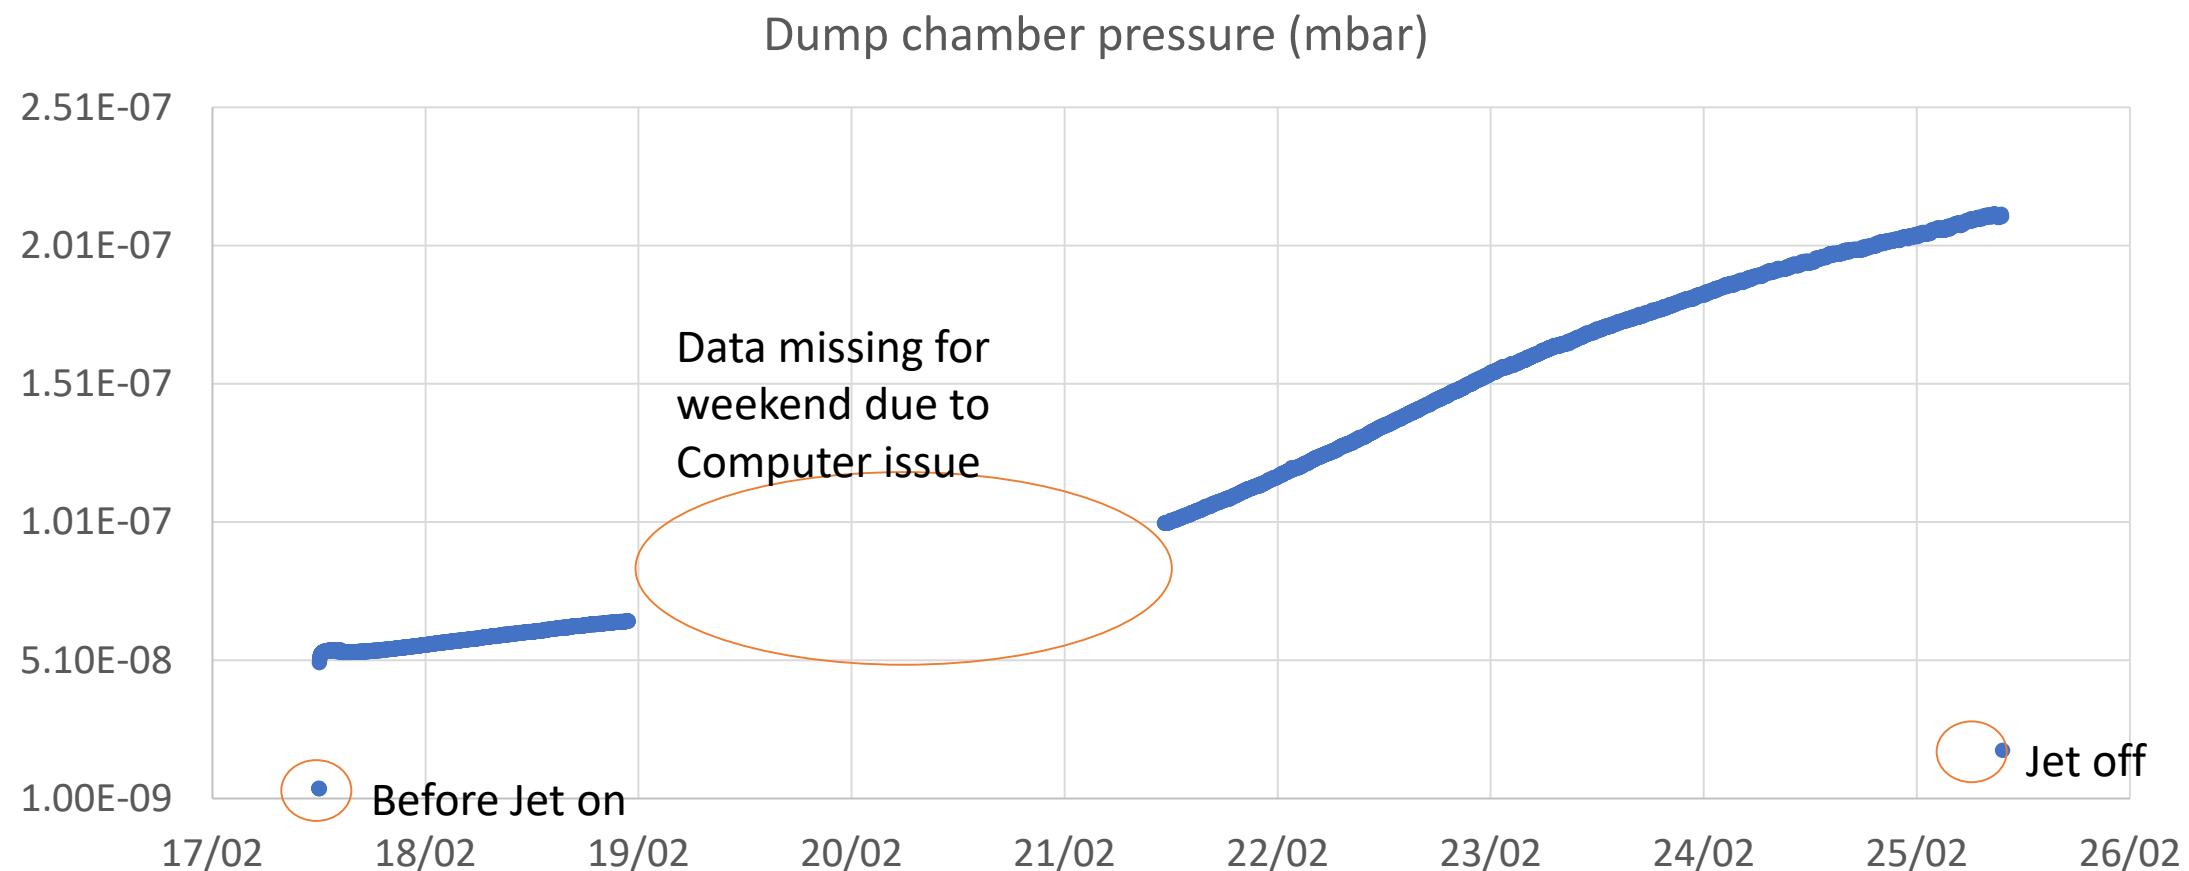

NEG subsystem

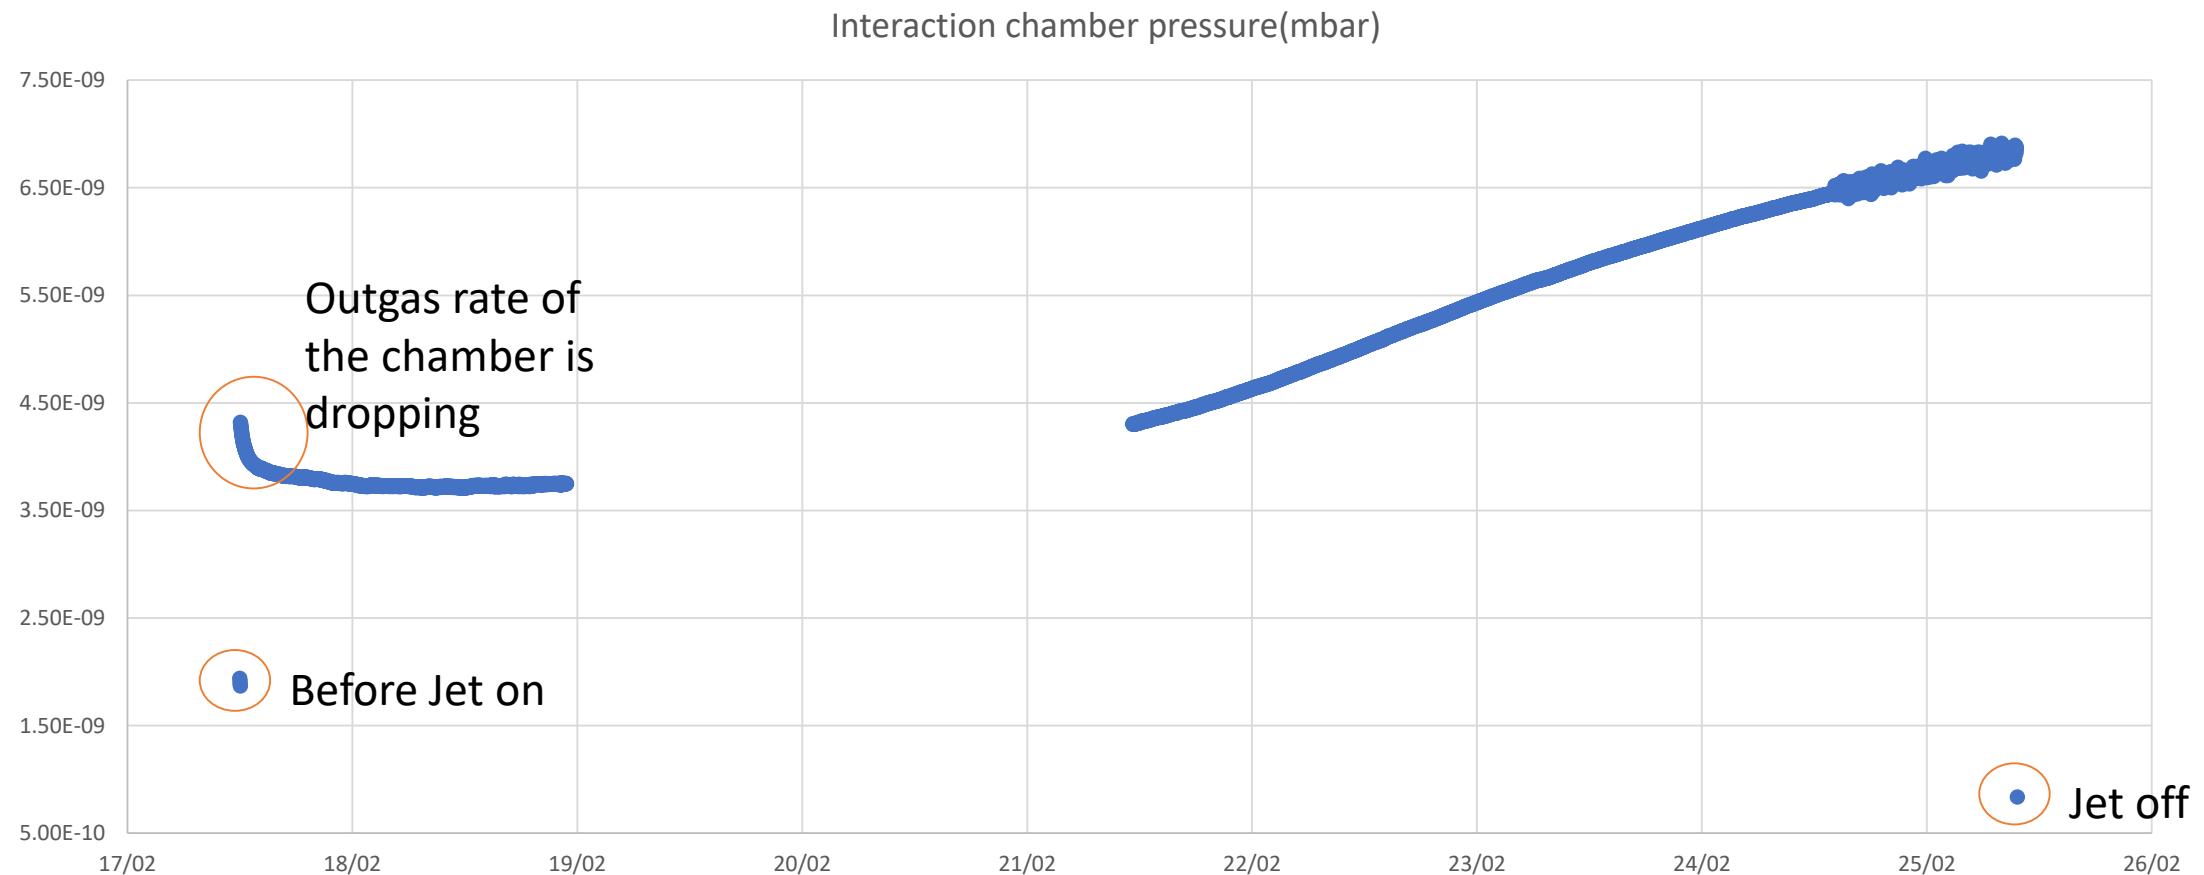

Neg pump installed in the Dump Chamber

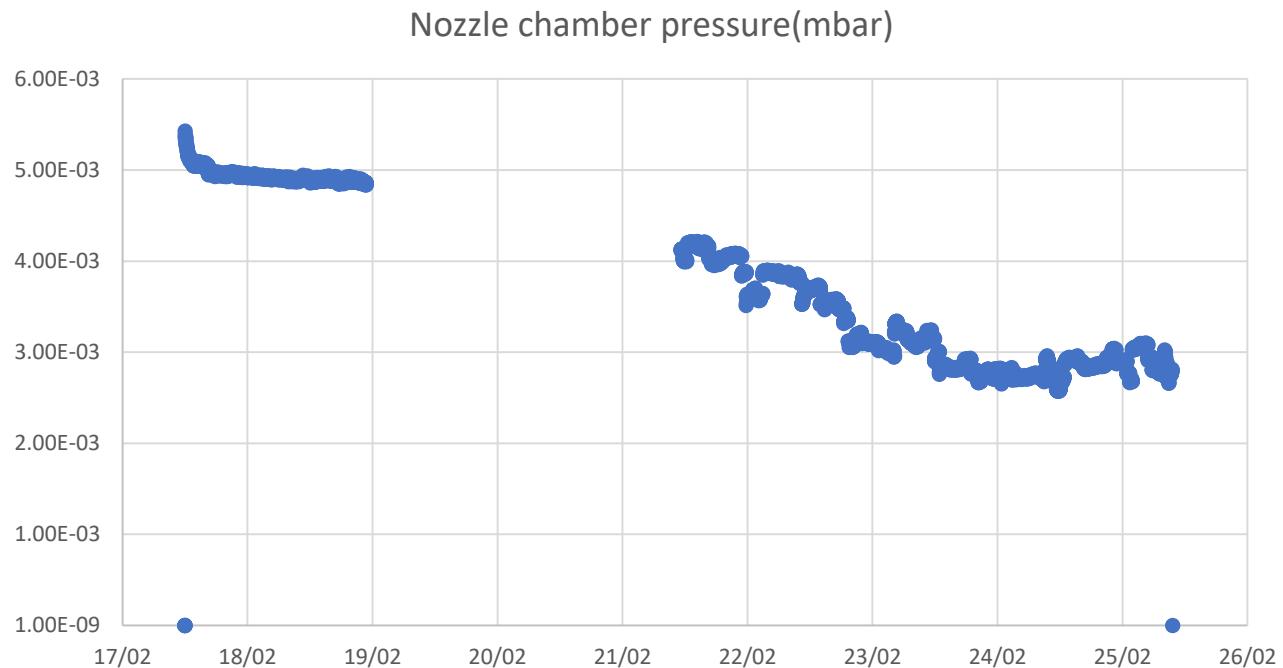

Saturation Data (dump chamber)

Saturation Data (interaction chamber)

Nozzle chamber

TMP in the nozzle chamber is warm but ok. The pressure even dropped a bit. ??Might be from the fluctuation of the main regulator or gas supply.

Saturation Data

Predicted Saturation Time (T+40hours)

| Chamber | Pressure / mbar | Pressure Change |
|-------------|-----------------|-----------------|
| Interaction | 3.80E-09 | 2.4% |
| Dump | 6.84E-08 | 27.5% |

Most Recent Measurement (T+170hours)

| Chamber | Pressure / mbar | Pressure Change |
|-------------|-----------------|-----------------|
| Interaction | 6.45E-09 | 73.9% |
| Dump | 1.97E-07 | 268.1% |

Summary

- Week long data shows the NEG is not saturated for $0.3*9$ mm 3rd skimmer (5bar inlet pressure).
- The saturation time is longer than the estimation
- It is Ok to use the NEG pump in the dump chamber for the smaller skimmer.
- Future work:
 - Larger 3rd skimmer ($0.7*9$ mm)
 - Preparation for shipping.
