

Saturation and Diffraction at the LHC and the EIC

Monday, 27 June 2022 - Friday, 1 July 2022

ECT*

Book of Abstracts

Contents

Welcome	1
Welcome by the ECT* Director	1
Quark-Gluon Plasma properties	1
Next-to-leading order photon+jet production	1
Pseudo and quasi gluon PDF in the BFKL approximation (online)	1
Evidence for the maximally entangled low x proton in Deep Inelastic Scattering from H1 data (remote)	1
Towards a unified scheme for moderate and small x EIC physics	2
Discussion: PDF, HIN	2
New constraints on PDFs, strong coupling, and SMEFT results using CMS jet data	2
Impact parameter extension to the MVgamma Model and application to forward p-Pb collisions in the rcBK evolved Improved-TMD framework	2
Nuclear leading twist shadowing and hadron production away from current fragmentation region	2
Massive quarks in the one-loop photo-to-dipole light cone wave function	2
NLO for hybrid kT-factorization and impact factors	3
Discussion: PDF, HIN	3
BFKL phenomenology	3
TMD gluon distribution at NLO within high energy factorization	3
Gluon and nucleon polarization at small- x	3
BFKL factorisation of Mueller-Tang jets in NLLA	3
Mueller-Tang jet phenomenology at the Tevatron and LHC (online)	4
Diffractive structure functions in the dipole picture	4
Discussion: BFKL, low x physics	4
The EIC project	4

The FOCAL project in ALICE	4
Mueller Navelet jets (remote)	4
Two particle correlations in small systems (remote)	4
Forward Higgs boson production in high-energy QCD at next-to-leading order	5
Discussion: BFKL, low x physics	5
Probing gluon saturation via diffractive jet production at the EIC	5
Proton hot spots and exclusive vector meson production	5
Forward dijet production in saturation formalism	5
Including large x dynamics into Color Glass Condensate	5
Exclusive vector meson production at next-to-leading order in the Color Glass Condensate framework	6
Numerical challenges of the JIMWLK equation with the kinematical constraint	6
Discussion: saturation	6
Saturation effects on nuclear geometry from exclusive vector meson production (remote)	6
Dijet production in DIS at one loop in the CGC (remote)	6
Evidence for top quark production in nucleus-nucleus collisions with the CMS experiment and future prospects	6
Recent results from LHCf (remote)	7
First approximation of the soft processes in Color Glass Condensate approach (remote) .	7
Discussion: saturation	7
The first experimental observation of odderon exchange (remote)	7
New scaling in elastic data	7
Isolating the Odderon in central production in high energy pA and AA collisions	7
Odderon contribution: non-linear evolution in the leading twist approximation (remote)	8
Hard Diffraction and proton tagging at the LHC	8
Diffractive longitudinal structure function at the Electron Ion Collider	8
Discussion: hard and soft diffraction	8
Few Aspects of Hard Diffractive Studies at the LHC	8
Multi-peripheral final states at the LHC and conformal spins in hard diffraction (remote)	8
Diffractive structure functions in the dipole approach	9

Diffractive results in CMS	9
Gluon dipole and factorization in diffractive DIS	9
Discussion: diffraction	9
Review of central exclusive production at LHCb	9
Diffractive exclusive WW, ZZ, ttbar, gamma gamma and ZX production in CMS TOTEM	9
Exclusive production of lepton pairs at the EIC	10
Overview of ATLAS forward proton detectors for LHC Run 3 and plans for the HL-LHC	10
Diffractive and exclusive processes in heavy ion collisions with CMS (remote)	10
Discussion: gamma gamma physics	10
Modelling W boson pair production with rapidity gaps (remote)	10
Open slot	10
Discussion: gamma gamma physics and diffraction	11
End of workshop	11
Hunting for the QCD instantons at the LHC in the forward proton mode	11
Registration	11
Discussion	11

2

Welcome

Corresponding Authors: tuomas.v.v.lappi@jyu.fi, soeren@kaiden.de, nestor.armesto@usc.es, martin.hentschinski@gmail.com, christophe.royon@cern.ch, a.sabio.vera@gmail.com, agustin.sabio.vera@cern.ch, abhay.deshpande@stonybrook.edu

3

Welcome by the ECT* Director

Corresponding Author: g.aarts@swan.ac.uk

4

Quark-Gluon Plasma properties

Corresponding Author: georgios.krintiras@cern.ch

5

Next-to-leading order photon+jet production

Corresponding Author: yair25m@gmail.com

6

Pseudo and quasi gluon PDF in the BFKL approximation (online)

Corresponding Author: giovanni.chirilli@gmail.com

7

Evidence for the maximally entangled low x proton in Deep Inelastic Scattering from H1 data (remote)

Corresponding Authors: krzysztof.kutak@googlemail.com, krzysztof.kutak@ifj.edu.pl

8

Towards a unified scheme for moderate and small x EIC physics

Corresponding Author: rboussarie@bnl.gov

9

Discussion: PDF, HIN

Corresponding Authors: soeren@kaiden.de, georgios.krintiras@cern.ch

10

New constraints on PDFs, strong coupling, and SMEFT results using CMS jet data

Corresponding Author: michael.pitt@cern.ch

11

Impact parameter extension to the MVgamma Model and application to forward p-Pb collisions in the rcBK evolved Improved-TMD framework

Corresponding Author: fedeganutti@gmail.com

12

Nuclear leading twist shadowing and hadron production away from current fragmentation region

Corresponding Authors: mxs43@psu.edu, mark.strikman@cern.ch

13

Massive quarks in the one-loop photo-to-dipole light cone wave function

Corresponding Authors: tuomas.v.v.lappi@jyu.fi, risto.sakari.paatelainen@cern.ch, risto.s.paatelainen@jyu.fi

14

NLO for hybrid kT-factorization and impact factors

Corresponding Author: hameren@ifj.edu.pl

15

Discussion: PDF, HIN

Corresponding Authors: georgios.krintiras@cern.ch, soeren@kaiden.de

16

BFKL phenomenology

Corresponding Author: papa@fis.unical.it

17

TMD gluon distribution at NLO within high energy factorization

Corresponding Author: martin.hentschinski@gmail.com

18

Gluon and nucleon polarization at small-x

Corresponding Authors: frangc88@gmail.com, francescogiovanni.celiberto@unipv.it

19

BFKL factorisation of Mueller-Tang jets in NLLA

Corresponding Author: colferai@fi.infn.it

20

Mueller-Tang jet phenomenology at the Tevatron and LHC (on-line)

21

Diffractive structure functions in the dipole picture

Corresponding Author: tuomas.v.v.lappi@jyu.fi

22

Discussion: BFKL, low x physics

Corresponding Authors: jamal.jalilian-marian@baruch.cuny.edu, martin.hentschinski@gmail.com

23

The EIC project

Corresponding Author: abhay.deshpande@stonybrook.edu

24

The FOCAL project in ALICE

Corresponding Author: daniel.tapia.takaki@cern.ch

25

Mueller Navelet jets (remote)

Corresponding Author: m814k769@home.ku.edu

26

Two particle correlations in small systems (remote)**Corresponding Author:** javier.alberto.murillo.quijada@cern.ch

27

Forward Higgs boson production in high-energy QCD at next-to-leading order**Corresponding Author:** mike.fucilla@libero.it

28

Discussion: BFKL, low x physics**Corresponding Authors:** martin.hentschinski@gmail.com, jamal.jalilian-marian@baruch.cuny.edu

29

Probing gluon saturation via diffractive jet production at the EIC**Corresponding Author:** edmond.iancu@cea.fr

30

Proton hot spots and exclusive vector meson production**Corresponding Author:** soeren@kaiden.de

31

Forward dijet production in saturation formalism**Corresponding Authors:** piotr.kotko@uj.edu.pl, piotr.kotko@fis.agh.edu.pl

32

Including large x dynamics into Color Glass Condensate**Corresponding Author:** jamal.jalilian-marian@baruch.cuny.edu

33

Exclusive vector meson production at next-to-leading order in the Color Glass Condensate framework**Corresponding Authors:** jani.j.penttala@student.jyu.fi, jajopent@student.jyu.fi

34

Numerical challenges of the JIMWLK equation with the kinematical constraint**Corresponding Authors:** piotr.korcyl@physik.uni-regensburg.de, piotr.korcyl@gmail.com

35

Discussion: saturation**Corresponding Authors:** daniel.tapia.takaki@cern.ch, edmond.iancu@cea.fr

36

Saturation effects on nuclear geometry from exclusive vector meson production (remote)**Corresponding Author:** bschenke@quark.phy.bnl.gov

37

Dijet production in DIS at one loop in the CGC (remote)**Corresponding Authors:** faridsalazar03@gmail.com, faridsalazar03@g.ucla.edu, farid.salazarwong@stonybrook.edu

38

Evidence for top quark production in nucleus-nucleus collisions with the CMS experiment and future prospects**Corresponding Author:** l.alcerro@cern.ch**39****Recent results from LHCf (remote)****Corresponding Author:** eugenio.berti@cern.ch**40****First approximation of the soft processes in Color Glass Condensate approach (remote)****Corresponding Authors:** michael.sanhuezar@sansano.usm.cl, michael.sanhueza.roa@gmail.com**41****Discussion: saturation****Corresponding Authors:** daniel.tapia.takaki@cern.ch, edmond.iancu@cea.fr**42****The first experimental observation of odderon exchange (remote)****Corresponding Authors:** nemesfri@gmail.com, frigyes.janos.nemes@cern.ch**43****New scaling in elastic data****Corresponding Author:** christophe.royon@cern.ch**44**

Isolating the Odderon in central production in high energy pA and AA collisions**Corresponding Author:** ronan.mcnulty@cern.ch**45****Odderon contribution: non-linear evolution in the leading twist approximation (remote)****Corresponding Authors:** michael.sanhuezar@sansano.usm.cl, michael.sanhueza.roa@gmail.com**46****Hard Diffraction and proton tagging at the LHC****Corresponding Author:** michael.pitt@cern.ch**47****Diffractive longitudinal structure function at the Electron Ion Collider****Corresponding Authors:** astasto@phys.psu.edu, anna.stasto@cern.ch**48****Discussion: hard and soft diffraction****Corresponding Authors:** ronan.mcnulty@cern.ch, michael.pitt@cern.ch, astasto@phys.psu.edu, anna.stasto@cern.ch**49****Few Aspects of Hard Diffractive Studies at the LHC****Corresponding Author:** maciej.trzebinski@cern.ch

50**Multi-peripheral final states at the LHC and conformal spins in hard diffraction (remote)****Corresponding Authors:** sabio@cern.ch, agustin.sabio.vera@cern.ch, a.sabio.vera@gmail.com**51****Diffractive structure functions in the dipole approach****Corresponding Author:** tuomas.v.v.lappi@jyu.fi**52****Diffractive results in CMS****Corresponding Authors:** michael.murray137@gmail.com, mjmurray@ku.edu**53****Gluon dipole and factorization in diffractive DIS****Corresponding Author:** trianta@ectstar.eu**54****Discussion: diffraction****Corresponding Authors:** astasto@phys.psu.edu, anna.stasto@cern.ch, ronan.mcnulty@cern.ch, michael.pitt@cern.ch**55****Review of central exclusive production at LHCb****Corresponding Author:** ronan.mcnulty@cern.ch

56**Diffractive exclusive WW, ZZ, ttbar, gamma gamma and ZX production in CMS TOTEM****Corresponding Author:** christophe.royon@cern.ch**57****Exclusive production of lepton pairs at the EIC****Corresponding Author:** janusz.chwastowski@cern.ch**58****Overview of ATLAS forward proton detectors for LHC Run 3 and plans for the HL-LHC****Corresponding Author:** maciej.piotr.lewicki@cern.ch**59****Diffractive and exclusive processes in heavy ion collisions with CMS (remote)****Corresponding Author:** c.baldenegro@cern.ch**60****Discussion: gamma gamma physics****61****Modelling W boson pair production with rapidity gaps (remote)****Corresponding Authors:** lucian.harland-lang@physics.ox.ac.uk, lucian.harland-lang@durham.ac.uk

62

Open slot

63

Discussion: gamma gamma physics and diffraction

Corresponding Authors: astasto@phys.psu.edu, anna.stasto@cern.ch, ronan.mcnulty@cern.ch,
michael.pitt@cern.ch

64

End of workshop

Corresponding Author: christophe.royon@cern.ch

65

Hunting for the QCD instantons at the LHC in the forward proton mode
