

Restructuring the ROOT Core

Rene Brun
19 January 2007

plan

- More details at the next team meeting
- Introduce a more modular structure with new subdirs "io", "math"
- Base will contain only the most basic and stable includes
- Work already started with TMath.h, TString.h, TBuffer.h
- Plan to change also TROOT.h, TClass.h, TSystem.h
- I hope to implement all these changes before the coming dev release.
