

ACES2011

Common ATLAS-CMS Electronics Workshop for SLHC

9 - 11 March 2011

Introduction (1)

- ▶ The two first ACES workshops (in 2007 and 2009) had a large attendance
 - ▶ Again a lot of registrations this year...
 - ▶ ...and the main auditorium is not available
- ▶ One of the conclusions of these workshops was to hold this event on a regular basis and to address specific sub-systems
 - ▶ The second ACES was devoted to the trackers
- ▶ Since then a lot of changes in the schedule and hence it was deemed necessary to review the expected upgrades during the next long shutdowns
 - ▶ 2013-2104, 2017 (?), 2021 (?)

► Organised in sessions

- *Overall plans of the machine and experiments*
- *Technologies and common projects*
- *Upgrade for phase 0 & 1 (Pixel, Trigger, Calorimeters, Muon spectrometers)*
- *Upgrade for phase 2 (Inner trackers, Calorimeters and Muon spectrometers, Trigger)*

► Limited time could not allow to have everybody presenting his work

- Posters available in this room and also during the dinner

► Very tight agenda

! Speakers to strictly respect their allocated time !

A few practical details

- ▶ The workshop is webcasted (many thanks to our IT colleagues)
 - ▶ Microphone to be used for discussion so that everyone can benefit of it
- ▶ During the breaks, coffee/tea and croissants/cookies will be given **inside** this room
 - ▶ Access to the posters
- ▶ You are on your own for the (short) lunches
- ▶ Details for the dinner in the Globe will be given later

A very important practical point

***We start at 8:30 on
Thursday and Friday***

Please be on time

The two European programs

ACEOLE and the SLHC-PP

For their support

Thanks for coming

&

Enjoy this workshop
