

Probing Top-quark Operators with Precision Electroweak Measurements

Yiming Liu

Institute of High Energy Physics, Chinese Academy of Sciences

LHC TOP WG meeting 2022/6/15

Based on 2205.05655 with Yuhao Wang, Cen Zhang, Lei Zhang,
Jiayin Gu

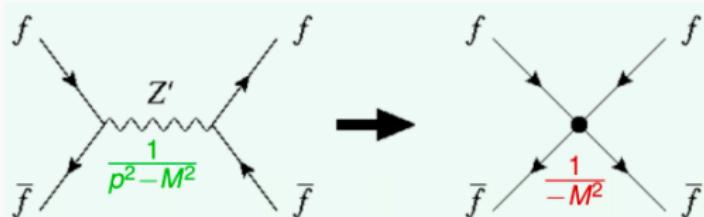

Motivation

- 1, At LEP1/2, low-energy precision measurements, and ee collider in the future, we can use loops to open up more possibilities. Loop factor suppression will be compensated for by the precision.
- 2, Our study is one of the many first steps towards a more complete loop-level SMEFT global analysis.

Theoretical framework

$$\frac{1}{p^2 - M^2} = \frac{1}{-M^2} \left[1 + \left(\frac{p^2}{M^2} \right) + \left(\frac{p^2}{M^2} \right)^2 + \dots \right]$$

$$\mathcal{L}_{\text{Eff}} = \mathcal{L}_{\text{SM}} + \sum_i \frac{C_i^{(6)}}{\Lambda^2} O_i^{(6)} + \sum_i \frac{C_i^{(8)}}{\Lambda^4} O_i^{(8)} + \dots$$

Theoretical framework

1, The first class involves the third generation quarks

$$Q_{\varphi Q}^{(1)}, Q_{\varphi Q}^{(3)}, Q_{\varphi t}, Q_{\varphi b}, Q_{\varphi \varphi}, Q_{tW}, Q_{tB}, Q_{bW}, Q_{bB}$$

2, The second class have tree-level contribution to
 $e^+ e^- \rightarrow f\bar{f}(f \neq t)$, $e^+ e^- \rightarrow W^+ W^-$.

$$Q_{\varphi Q}^{(1)}, Q_{\varphi Q}^{(3)}, Q_{\varphi u}, Q_{\varphi d}, Q_{\varphi l}^{(1)}, Q_{\varphi l}^{(3)}, Q_{\varphi e}, Q'_{ll}, Q_{\varphi D}, Q_{\varphi WB}, O_W$$

3, The third class are 4-fermion operators that directly contribute to
the $e^+ e^- \rightarrow f\bar{f}(f \neq t)$ and several low energy scattering processes at tree level.

$$Q_{qe}, Q_{eu}, Q_{ed}, Q_{lq}^{(1)}, Q_{lq}^{(3)}, Q_{lu}, Q_{ld}, O_{ll}, Q_{ee}, Q_{le}$$

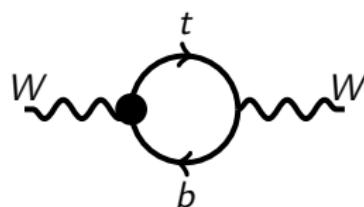

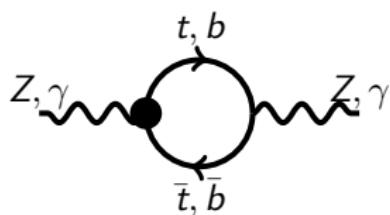

4, The fourth class are 4-fermion operators that directly contribute to the $e^+ e^- \rightarrow b\bar{b}$ at tree level.

$$Q_{lQ}^{(1)}, Q_{lQ}^{(3)}, Q_{lb}, Q_{eQ}, Q_{eb}$$

Theoretical framework

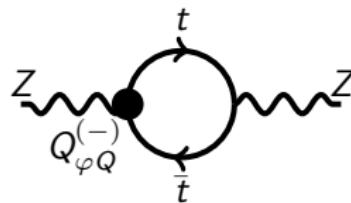

1, For observable without Zbb couplings, the nine operators modify the self-energies of W , Z , γ at loop-level, and therefore affect all measurements indirectly.

Theoretical framework

Example

$$\begin{aligned} Q_{\varphi Q}^{(-)} &= Q_{\varphi Q}^{(1)} - Q_{\varphi Q}^{(3)} \\ &= - \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu^I \varphi \right) (\bar{q}_3 \tau^I \gamma^\mu q_3) + \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu \varphi \right) (\bar{q}_3 \gamma^\mu q_3) \\ &= - \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu^1 \varphi \right) (\bar{q}_3 \tau^1 \gamma^\mu q_3) - \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu^2 \varphi \right) (\bar{q}_3 \tau^2 \gamma^\mu q_3) \\ &\quad - \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu^3 \varphi \right) (\bar{q}_3 \tau^3 \gamma^\mu q_3) + \left(\varphi^\dagger i \overset{\leftrightarrow}{D}_\mu \varphi \right) (\bar{q}_3 \gamma^\mu q_3) \\ &= \frac{-igv^2}{\sqrt{2}} W_\mu^+ (\bar{b} \gamma_\mu t) + \frac{igv^2}{\sqrt{2}} W_\mu^- (\bar{t} \gamma_\mu b) + \frac{igZ_\mu}{\cos \theta_W} v^2 \bar{t} \gamma_\mu t + \dots \end{aligned}$$

Theoretical framework

2, For observable with Zbb couplings, $Q_{\varphi Q}^{(3)}$, $Q_{\varphi Q}^{(1)}$, $Q_{\varphi b}$, Q_{bW} , Q_{bB} modify the $Z \rightarrow b\bar{b}$ measurements at tree-level.

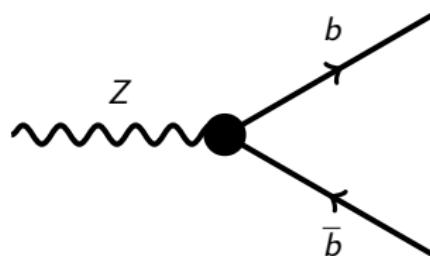

$$Q_{\varphi Q}^{(3)} = i \left(\phi^\dagger \tau^I D_\mu \phi \right) \left(\bar{Q} \gamma^\mu \tau^I Q \right)$$

$$Q_{\varphi Q}^{(1)} = i \left(\phi^\dagger D_\mu \phi \right) \left(\bar{Q} \gamma^\mu Q \right)$$

$$Q_{\varphi b} = i \left(\phi^\dagger D_\mu \phi \right) \left(\bar{b} \gamma^\mu b \right)$$

$$Q_{bW} = \left(\bar{q} \sigma^{\mu\nu} \tau^I b \right) \phi W'_{\mu\nu}$$

$$Q_{bB} = \left(\bar{q} \sigma^{\mu\nu} b \right) \phi B_{\mu\nu}$$

Theoretical framework

3, For observable with Zbb couplings, $Q_{\varphi Q}^{(3)}$, $Q_{\varphi Q}^{(1)}$, $Q_{\varphi t}$, Q_{tW} , Q_{tb} not only modify the self-energies of W , Z , γ at loop-level, but also modify the $Z\bar{b}\bar{b}$ vertex at loop-level.

$$Q_{\varphi Q}^{(3)} = i \left(\phi^\dagger \tau^I D_\mu \phi \right) \left(\bar{Q} \gamma^\mu \tau^I Q \right)$$

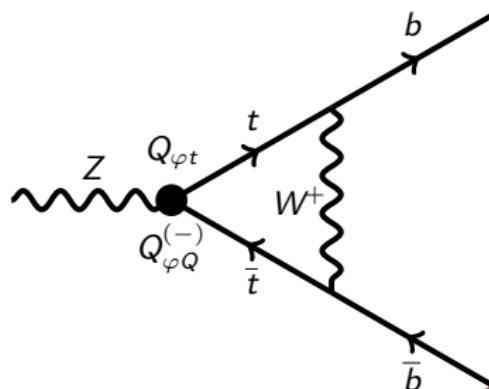

$$Q_{\varphi Q}^{(1)} = i \left(\phi^\dagger D_\mu \phi \right) \left(\bar{Q} \gamma^\mu Q \right)$$

$$Q_{\varphi t} = i \left(\phi^\dagger D_\mu \phi \right) \left(\bar{t} \gamma^\mu t \right)$$

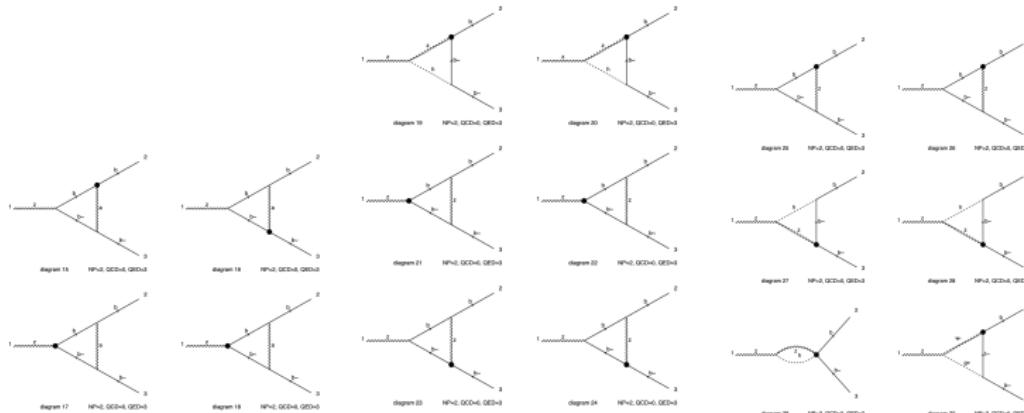

$$Q_{\varphi tb} = i \left(\tilde{\phi}^\dagger D_\mu \phi \right) \left(\bar{t} \gamma^\mu b \right)$$

$$Q_{tW} = \left(\bar{q} \sigma^{\mu\nu} \tau^I t \right) \tilde{\phi} W_{\mu\nu}^I$$

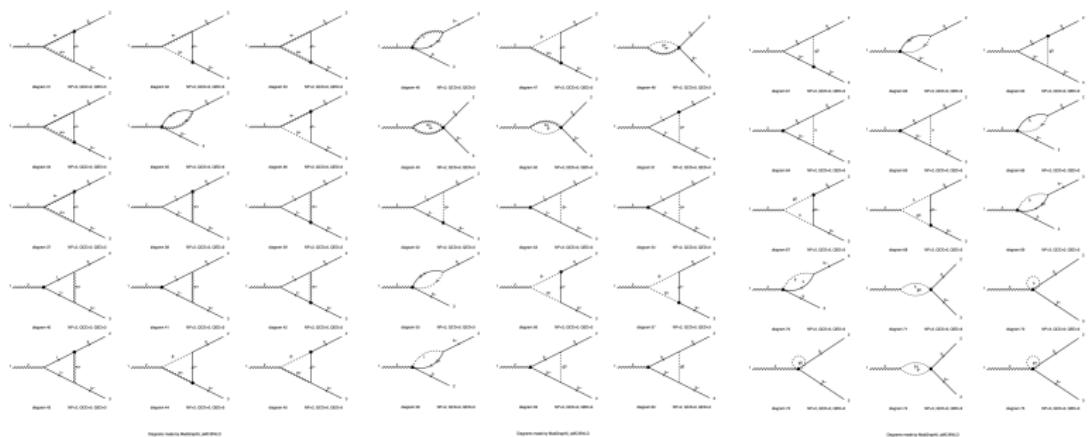

$$Q_{tb} = (\bar{q} \sigma^{\mu\nu} t) \tilde{\phi} B_{\mu\nu}$$

Theoretical framework

Theoretical framework

Theoretical framework

To better understand the impacts of the 3rd-generation-quark operators, we trade $\frac{c_{\varphi D}}{\Lambda^2} Q_{\varphi D}$ and $\frac{c_{\varphi WB}}{\Lambda^2} Q_{\varphi WB}$ in the Warsaw basis for $\frac{c_{D\varphi B}}{\Lambda^2} iD^\mu \varphi^\dagger D^\nu \varphi B_{\mu\nu}$ and $\frac{c_{D\varphi W}}{\Lambda^2} iD^\mu \varphi^\dagger \sigma_a \varphi W_{\mu\nu}^a$:

$$\begin{aligned} Q_{D\varphi B} &\equiv iD_\mu \phi^\dagger D_\nu \phi B^{\mu\nu} \\ &= -\frac{g'}{4} Q_{\varphi B} + \frac{g'}{2} \sum_\psi Y_\psi Q_{\varphi\psi}^{(1)} + \frac{g'}{4} Q_{\varphi\square} + g' Q_{\varphi D} - \frac{g}{4} Q_{\varphi WB} \\ Q_{D\varphi W} &\equiv iD_\mu \phi^\dagger \sigma_a D_\nu \phi W^{a\mu\nu} \\ &= \frac{g}{4} \sum_F Q_{\varphi F}^{(3)} + \frac{g}{4} \left(3Q_{\varphi\square} + 8\lambda_\phi Q_\varphi - 4\mu_\phi^2 (\phi^\dagger \phi)^2 \right) + \\ &\quad + \frac{g}{2} \left(y_{ij}^e (Q_{e\varphi})_{ij} + y_{ij}^d (Q_{d\varphi})_{ij} + y_{ij}^u (Q_{u\varphi})_{ij} + \text{h.c.} \right) \\ &\quad - \frac{g'}{4} Q_{\varphi WB} - \frac{g}{4} Q_{\varphi W}, \end{aligned}$$

Results

Conclusions

- 1 The outstanding precision of these measurements (especially at future lepton colliders) could be sensitive to many important loop contributions of the new physics.
- 2 The tree-level contributions of the bottom dipole operators to the electroweak processes are non-negligible.
- 3 Our study is one of the many first steps towards a more complete loop-level SMEFT global analysis, for which many improvements are still needed.

Thank you for your attention!
