

25th International Workshop on Multimedia in Physics Teaching and Learning

Thursday 8 September 2022 - Saturday 10 September 2022

Scientific Programme

Enhancing the use of multimedia and technology in Physics Teaching and Learning.

From good practices to new possible approaches to specific physics content.

Modern equipment and technology to improve Physics Teaching and Learning.

From productive use of modern equipment and technology to lessons strategies and curriculum modifications.

Challenges and opportunities of use of multimedia including distance learning.

From own experiences and reflection emerged during the time of the pandemic to new broader proposals.

Proposals that go beyond tracks A, B and C.

We would like to encourage you to allocate your contribution to one of the three thematic fields if possible, but we also accept proposals that go beyond this.
