## **Session Program**

7-9 Jun 2022

## Inter-Disciplinary Underground Science and Technology

## #3 Session (L. Ottaviani/I. Lázaro)

Avignon, Conference room AT04 Avignon Université - Campus Hannah Arendt - Bâtiment Sud

## Wednesday 8 June

Speaker   Dr Eric Compain   14:30-14:50   ArchéMuon: A Gallo-Roman archaeological site as a "sandbox" for testing muography and geophysical imaging techniques   Speaker   Mr Theodore Avgitas   14:50-15:20   Coffee break   15:20-15:40   Full-wave Radar Tomography for Astrophysics: Interior structure of small boc carrier effects   Speaker   Oluwatoki Yusuf   15:40-16:00   Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker   Dylan Sabulsky   16:00-16:20   Asymmetric Backward Peaking Radiation Patterns from an Accelerated Relativistic Bremsstrahlung Particle In High Density Mediums	14:00-14:30	Winlight System upcoming underground operations.
Dr Eric Compain   14:30-14:50   ArchéMuon: A Gallo-Roman archaeological site as a "sandbox" for testing muography and geophysical imaging techniques   Speaker   Mr Theodore Avgitas   14:50-15:20 Coffee break   15:20-15:40   Full-wave Radar Tomography for Astrophysics: Interior structure of small boo carrier effects   Speaker   Oluwatoki Yusuf   15:40-16:00   Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker   Dylan Sabulsky		
ArchéMuon: A Gallo-Roman archaeological site as a "sandbox" for testing muography and geophysical imaging techniques Speaker Mr Theodore Avgitas 14:50-15:20 Coffee break 15:20-15:40 Full-wave Radar Tomography for Astrophysics: Interior structure of small boo carrier effects Speaker Oluwatoki Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	•	
muography and geophysical imaging techniques Speaker Mr Theodore Avgitas 14:50-15:20 Coffee break 15:20-15:40 Full-wave Radar Tomography for Astrophysics: Interior structure of small boo carrier effects Speaker Oluwatoki Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	14:30-14:50	
Speaker Mr Theodore Avgitas   14:50-15:20 Coffee break   15:20-15:40   Full-wave Radar Tomography for Astrophysics: Interior structure of small boo carrier effects   Speaker Oluwatoki Yusuf   0luwatoki Yusuf   15:40-16:00   Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker Dylan Sabulsky   16:00-16:20   Asymmetric Backward Peaking Radiation Patterns from an Accelerated		
Mr Theodore Avgitas    14:50-15:20 Coffee break   15:20-15:40 Full-wave Radar Tomography for Astrophysics: Interior structure of small booccarrier effects   Speaker Oluwatoki Yusuf   15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker Dylan Sabulsky   16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	muography a	and geophysical imaging techniques
14:50-15:20 Coffee break   15:20-15:40 Full-wave Radar Tomography for Astrophysics: Interior structure of small booccarrier effects   Speaker Oluwatoki Yusuf Yusuf   15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker Dylan Sabulsky   16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	•	
15:20-15:40 Full-wave Radar Tomography for Astrophysics: Interior structure of small boo carrier effects Speaker Oluwatoki Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	Mr Theodore Avg	JITAS
Full-wave Radar Tomography for Astrophysics: Interior structure of small boc carrier effects   Speaker   Oluwatoki Yusuf   15:40-16:00   Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker   Dylan Sabulsky   16:00-16:20   Asymmetric Backward Peaking Radiation Patterns from an Accelerated	14:50-15:20	Coffee break
Full-wave Radar Tomography for Astrophysics: Interior structure of small boc carrier effects   Speaker   Oluwatoki Yusuf   15:40-16:00   Reaching ultra-high vacuum for a large vacuum vessel in an underground environment   Speaker   Dylan Sabulsky   16:00-16:20   Asymmetric Backward Peaking Radiation Patterns from an Accelerated		
carrier effects Speaker Oluwatoki Yusuf Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated		
Speaker Oluwatoki Yusuf Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	15:20-15:40	
Oluwatoki Yusuf Yusuf 15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated		idar Tomography for Astrophysics: Interior structure of small body
15:40-16:00 Reaching ultra-high vacuum for a large vacuum vessel in an underground environment Speaker Dylan Sabulsky 16:00-16:20 Asymmetric Backward Peaking Radiation Patterns from an Accelerated	Full-wave Ra
