

Experimental constraints on Higgs properties

Thursday 9 June 2022 13:00 (40 minutes)

The talk will review the physics potential of future lepton (e+e-) colliders for Higgs production, e.g. Higgsstrahlung ($e e \rightarrow HZ$) and VBF ($e e \rightarrow H \nu \nu$ ($W W \rightarrow H$)), highlighting in particular the experimental targets and those measurements that rely heavily on theory inputs, such as precision calculations.
