

The AMFlow approach

Friday 17 June 2022 14:30 (40 minutes)

The talk will discuss the status and applications of the AMFlow method to the calculation of IBP systems and the solution of differential equations for master integrals. The talk will highlight how this technology can be exploited for multiloop computations at future lepton colliders.

Author: LIU, Xiao (University of Oxford)

Presenter: LIU, Xiao (University of Oxford)

Session Classification: Talks and discussions: multi-loop computational techniques
