

# 14th International Workshop on Boosted Object Phenomenology, Reconstruction, Measurements and Searches in HEP

Contribution ID: 9

Type: **Online presentation**

## 16 Years of Boosting

*Tuesday 16 August 2022 16:40 (30 minutes)*

In this talk, I will review my engagement in the field of jet substructure, from work as an undergraduate starting in 2006 to my departure from academia in 2022. I will review what I think the big problems in the field are, from outstanding physics questions to issues with retention and promotion of leaders in this field. I will also discuss what I see as the scope creep of jet substructure as it attempts to maintain relevance into the future.
