

The way of the force: GitOps on JEEDY

Wednesday 27 April 2022 11:30 (25 minutes)

In this session you will learn how JEEDY team, build its internal infrastructure profiting of ArgoCD and git. In particular we will show how we managed:

1. monitoring infrastructure for both us and users
2. submission of user cronjobs

The session will go through advantages, pitfalls of the GitOps approach that we faced during our development.
