

# Abusing helm library chart and values for fun and profit

*Wednesday 27 April 2022 09:35 (25 minutes)*

After sharing some context details about how I manage my personal k3s cluster. I would share a different way to create helm charts that heavily relies on a library chart and makes everything configurable via helm values. This approach is the one that the k8s-at-home project uses (<https://docs.k8s-at-home.com/our-helm-charts/common-library/>).
