

Shhh... It's a Secret!

Wednesday 27 April 2022 11:55 (25 minutes)

There are many, many options to handle secrets in Kubernetes deployments, and even more when considering handling sensitive data in GitOps setups.

In this short presentation we present the differences between handling (encrypted) data in Git, secrets inside the clusters, and the different tools available to simplify these tasks.

Presenter: ROCHA, Ricardo (CERN)
