

## Today: Upgrading the largest Scientific Instrument – the LHC Restart

*Science in School* is a non-profit magazine funded by EIROforum, a collaboration between eight European intergovernmental research organizations.

We aim to connect teachers and students to inspiring science and technology, in order to foster positive attitudes towards the science that shapes our lives.

Our new webinar series gives students a chance to hear directly from scientists working at the cutting edge of science at the EIROforum research sites.

## Coming soon (May 20<sup>th</sup>): The Biggest Eyes on the Sky

How do scientists try to unravel the mysteries of the universe? Join us on a virtual trip to the ESO telescopes in Chile and get an insight into life and work in one of the driest places on Earth.

See the Science in School Events page for more details: [www.scienceinschool.org/events/](http://www.scienceinschool.org/events/)
