Recent Studies on the PRISM FFAG Ring

Thursday 4 August 2011 11:00 (30 minutes)

Next generation lepton flavour violation experiments require high intensity and high quality muon beams. The PRISM task force focuses on accelerator R&D for realizing such beams using an FFAG ring. The scaling and non-scaling designs for the PRISM FFAG ring are discussed. The recent studies on injection/extraction systems and matching to the solenoid channel are outlined. The future plans for the study are presented.
