

# NuFact'11 XIIIth Workshop on Neutrino Factories, Superbeams and Beta-beams

Contribution ID: 9

Type: **not specified**

## **WG3 neutrino flux monitoring in the neutrino factory**

*Tuesday 2 August 2011 14:55 (15 minutes)*

The presentation will summarize the beam controls necessary to refine the flux in the neutrino factory with a precision of  $10^{-3}$ . A polarimeter, a beam divergence measurement and a beam current measurement will do the job
