## **NLO JIMWLK with massive quarks**

*Sunday 25 September 2022 17:20 (20 minutes)*

High energy evolution of scattering amplitudes is governed by the JIMWLK Hamiltonian. At NLO it involves quark contributions. The NLO JIMWLK Hamiltonian with massless quarks has been known for some time. Yet, the quest for precision requires inclusion of effects due to quark masses. This gap has been filled.

**Presenters:** LUBLINSKY, Michael (Ben-Gurion University of the Negev (IL)); Prof. LUBLINSKY, Michael

**Session Classification:** Recent theoretical results on QCD and saturation

**Track Classification:** Recent theoretical results on QCD and saturation
