Crowd4SDG - Citizen Science for the SDGs

Wednesday 15 February 2023 12:30 (20 minutes)

Learn on how citizens can influence and help measure the initiatives to achieve the SDGs in their own community through the Crowd4SDG project.

Crowd4SDG is a Horizon 2020 Research and Innovation Action supported by the European Commission's Science with and for Society (SwafS) programme. Through an innovation cycle called GEAR (GATHER, EVALUATE, ACCELERATE, REFINE), the transdisciplinary Crowd4SDG consortium of six partners will promote the development of citizen science projects aimed at tackling the Sustainable Development Goals (SDGs), with a focus on climate action.

Presenter: MARCELLONI, Claudia (CERN)
