

Part 2: How do our student programmes work and how you can take part

Wednesday 15 February 2023 15:25 (20 minutes)

In this session we will open up the possibilities for interacting with our students. Two CERN people who have been active with our students will share their experience and what they have gotten out of doing it. We will give a short overview on the collaborations we have, examples of student programmes, and the key learning outcomes we push for.

Presenters: BATISTA, Catarina (Helsinki University of Technology (FI)); WIRTAVUORI, Laura (Helsinki University of Technology (FI))
