

## Part 1: Innovation for solving wicked problems

*Wednesday 15 February 2023 14:05 (1h 20m)*

What do we hope the world will look like in 30 years? How have we solved challenges like hunger, poverty, and biodiversity loss? In this workshop, we will imagine just that and consider the changes we need to implement to achieve that desirable future. During the exercise, we will look at technological, social, economic, ethical, political, and environmental aspects and how they are deeply interconnected.

**Presenters:** BATISTA, Catarina (Helsinki University of Technology (FI)); WIRTAVUORI, Laura (Helsinki University of Technology (FI))
