

Hackathons and Interactive workshops - Perks and Perils of behind the scenes

Thursday 16 February 2023 11:25 (45 minutes)

Learn from seasoned organizers what works and what is better to avoid while planning and organizing a hackathon, a festival, or an interactive workshop. Neal Hartman, Director of the CineGlobe Film Festival at CERN and Andrew Purcell, who has contributed to the organisation of many CERN openlab events, CERN Alumni events and several editions of the CERN Webfest, will talk about their experience accumulated over the years and draw lessons learned from them.

After the presentations take place, we will open for an innovation session, where you can bring your own ideas and challenges for the event you might have ahead, and we will help you conceive it.

Presenters: PURCELL, Andrew Robert (CERN); HARTMAN, Neal David (Lawrence Berkeley National Lab. (US))
