

Coffee papers: Framing the future of physics collaborations together

Thursday 16 February 2023 13:50 (50 minutes)

In this session we will come together to explore: What kind of inventions might disrupt physics collaborations and bring them to the next level? We will run a thought experiment in teams to create hands on ideas –some of which might form coffee papers. Winning team gets a special prize, so don't miss out!

Presenters: BATISTA, Catarina (Helsinki University of Technology (FI)); UTRIAINEN, Tuuli Maria (Helsinki Institute of Physics (FI))
