

Revised mandate for Commission on Low Temperature Physics (C5)

IUPAP resolves to update Article 1 of the Mandate of its Commission on Low Temperature Physics (C5) to better reflect the current situation of the field. The revised Article reads:

To promote the exchange of information and views among the members of the international scientific community in the general field of Low Temperature Physics including

- 1. Quantum phenomena particularly those that only manifest themselves at low temperatures;*
- 2. Quantum materials including quantum fluids, solids and condensates;*
- 3. The basic mechanisms and physics of superconductivity;*
- 4. Research and development in cryogenic quantum technologies.*
