

# Teaching Python the Sustainable Way: Lessons Learned at HSF Training

*Monday, September 12, 2022 5:30 PM (30 minutes)*

With thousands of new members joining the HEP community every year, it is of paramount importance to have training strategies that are efficient and sustainable at scale. The HEP Software Foundation (HSF) Training Working Group offers workshops with this goal in mind. We present our goals, technical setup, and experiences with regard to the most recent training events. The talk also aims to further improve the integration of HSF Training with the HEP community as a whole.
