Recent developments in event generators

Tuesday 29 November 2022 11:55 (30 minutes)

This talk will be a brief overview of recent developments in event generation, with a focus on the interplay between high-precision QCD perturbation theory and parton-shower resummation. It will also touch on topics beyond LHC.

Declaration

I certify that I have checked that I am authorised to submit the abstract with the listed co-authors with their current affiliations

Change of Speaker

I understand that change of speaker is allowed provided that no participant gives more than one talk. Otherwise, we will ask the speaker to choose between one or the other abstract to be presented.

Author: HOCHE, Stefan

Presenter: HOCHE, Stefan

Session Classification: Plenary

Track Classification: WG2: Event Simulations and Monte Carlo Tools
