Highlights in heavy-ion physics at the LHC

Friday 2 December 2022 15:10 (30 minutes)

In this contribution, I will present selected recent measurements from heavy-ion collisions at the LHC that help us characterize the quark-gluon plasma created in these collisions. Limits of its formation will be discussed with the support of similar measurements performed in pp and p-Pb collisions.

Declaration

I certify that I have checked that I am authorised to submit the abstract with the listed co-authors with their current affiliations

Change of Speaker

I understand that change of speaker is allowed provided that no participant gives more than one talk. Otherwise, we will ask the speaker to choose between one or the other abstract to be presented.

Author: KRIZKOVA GAJDOSOVA, Katarina (CERN)

Presenter: KRIZKOVA GAJDOSOVA, Katarina (CERN)

Session Classification: Plenary

Track Classification: WG6: Quark-Gluon Plasma & Multi Parton Interactions
