

Session Program

25-29 Sept 2006

**Vertex 2006 15th International Workshop on
Vertex Detectors**

***Novel detectors, materials and radiation
damage***

Relais San Clemente, Perugia (ITALY)
Perugia (ITALY)

Wednesday 27 September

11:00

Novel detectors, materials and radiation damage

Session | Location: Relais San Clemente, Perugia (ITALY), Perugia (ITALY)

11:00-11:30 **Radiation hardness experience in CDF/D0 silicon detectors**

Speaker

Dr Marcel Stanitzki

11:30-12:00 **Status of diamond detectors and their application**

Speaker

Rainer Wallny

12:00-12:30 **Czochralski Silicon Sensors status of development**

Speaker

Alberto Messineo

12:30-13:00

Comparison between p-type and n-type substrate technologies for silicon detectors for very high luminosity collider

Speakers

Marina Artuso, Marina Artuso

13:00-13:15 **Gossip : Gaseus Pixel**

Speaker

Els Koffeman

13:30
