Latin American Symposium on High Energy Physics

The Latin American Symposium on High Energy Physics (SILAFEA) is a traditional event that brings together the regional and international community of particle physics and related areas such as cosmology, gravitation and astroparticle physics. The conference has been the main regional hub for discussions on topics in the relevant fields, knowledge update and the exploration of new ideas and perspectives towards the future. The event also promotes the expansion of regional and international cooperation as well as the advancement of younger scientists and students.
