

iFAST Challenge 2022: getting to know each other

😊 WELCOME! 😊

How to prepare

Ready to meet your colleagues? **Just a few more clicks and off we go!** 😊

Here's the link: <https://spatial.chat/s/Cn4wkaWdFMpRNsvKUyht>

You can log in from now on but please, do not add any files.

You will be asked to **create your profile**. Please, put the following information in:

- your name and the initial of your family name
- your nationality
- your expertise (field of study)
- the name of one object which is very representative of who you are or what you like – literally or metaphorically (see example below); make it personal, i.e., do not refer to your expertise or field of study)

Keep this information short. Here's an example:

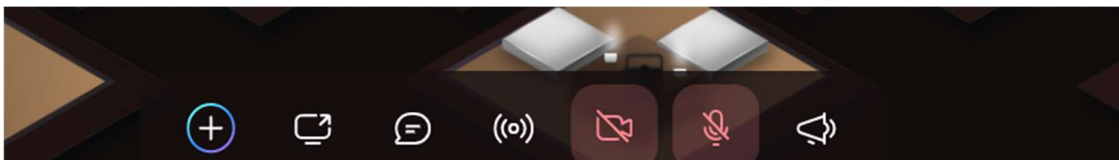

John S.
Irish
neutrino specialist
bungee

**maybe John simply loves bungee jumping;
maybe he likes going fast head-on; or else ?*

(SpatialChat will remember your profile for later even if you log out; you can also stay logged in all the time if you like)

Make sure you select the right camera and microphone in SpatialChat when signing in.

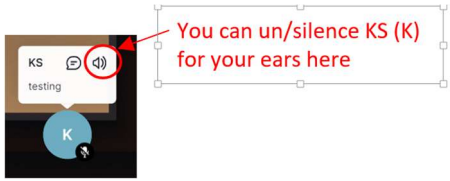

Be ready to work on a document online (Powerpoint may be preferable) and to share your screen when prompted to do so. Test the bottom tool bar!

At some point, you will be divided into four groups as specified below. Make sure you know your group label (letter) before we start.

First Name	Last Name	Ice-breaking group
Donna Ebizale	Alogaga	C
Reema	AITAMIMI	B
Eleftheria	Apatzidou	B
Darina	Barkhatova	D
Blandine	Berdugo	C
Amour Freddy	Bilombo Bazedimba	D
Sofia	Bisoffi	B
Salvatore Manfredi	D'Angelo	C
Nabil	El-Kassem	A
Ruben	Heine	A
Sara	Kamrowska	D
Theodora	Karpouzi	D
Luis Francisco	Miranda	B
Sulaiman	MOHAMMAD	D
Anna	Morrison	D
Pablo	P. Martinez-Reviriego	A
Felix	Palatty	B
Mohammad Tayyab	Pasha	C
Laura Karina	Pedraza	A
Agris	Ratniks	B
Seerat	Sekhon	C
Omar Ehab Yousry Kamel	Shalby	A
Poppy	Silk	C
Mateusz	Wasiluk	A

* Troubleshooting and technicals

Problem or question	What to do
You do not hear anything	<ul style="list-style-type: none">- Check whether you have selected the right audio system (both on your computer/other device and in SpatialChat)- Check whether your device is not using all the system resources elsewhere (close unused applications)- If the two solutions above do not work, try to log out and in again
You do not hear the person you are close to while you can hear some other persons	<p>Make sure you have not accidentally silenced the person for yourself; it can be done (and undone) by clicking the speaker icon at the person's avatar</p>  <p>The image shows a screenshot of a SpatialChat interface. It features a person's avatar with a name 'KS' and the text 'testing' below it. A speaker icon is circled in red, and a red arrow points to it from a text box that says 'You can un/silence KS (K) for your ears here'. Below the avatar is a blue circular icon with the letter 'K'.</p>
You would like to talk to one specific person but you do not know how to find him/her quickly	Just double-click on this person's avatar in the space or on the person's name in the participant list (up right) and you will be taken close to that person
You do not see other people	Try to zoom out to see the whole space (you should have the zooming slider in the bottom right corner), you probably see just a little bit of space around you

More details live. [Bring your open minds seasoned with a sense of humour and be ready to play! :\)](#)
