The DT Survey 2010 – Results, conclusions, changes

Christmas lunch 2010 ?

Drink

2 December 2010

DT personnel matters

- **Two technical students arrived.**
 - Lucia CASTILLO GARCIA (ESP), (shares office with Didier Piedigrossi). Project LHCb RICH/TORCH photodetector characterization. Supervisor Thierry Gys.
 - Anastasia XYDOU (GR), cooling lab. Project: Leak detection/in-situ neutralization. Supervisor: Paola Tropea.
- New fellow, Markus GABRYSCH (DE), Simulation and Characterization of silicon sensors for the LHC upgrade“, supervisor: Michael Moll, start 1 Feb.
- Fellow position (2 years) from Marie Curie network MC-PAD was transferred from PSI to CERN. Project: ATLAS ALFA and AX-PET. Supervisor CJ, start 1 Jan.
- Fellowship contract extensions Aurelie Maurisset (6 m) and Alessandro La Rosa (3 m)
- Antoine Guipet (bondlab) will leave group on 31 January 2011. No IC position was available.

Projects

We agreed with ESE group (Electronics Systems Engineering) that Gilles Maire will support two ESE activities:

- NA62 electronics infrastructure: Evaluate the needs for refurbishment of the general electronics and electrical infrastructure for the NA62 experiment.
- Upgrade of the interface between the CMS Beam Conditions Monitor (BCM) and the beam interlock system (BIS).

Documents Page

Please use the side menu to view documents from each Section.

PH-EP Technical Notes serve to document work and results of potentially common interest. These documents are stored in CDS and obtain a citable reference, e.g. [PH-EP-Tech-Note-2009-002](#).

Work Packages are agreements between PH-DT and experiments. The documents are stored in EDMS.

Group documents contain mandate, manpower tables, etc. They are also stored in EDMS and are only accessible for PH/DT members.
