

Concluding Remarks

27th Geant4 Collaboration Meeting,
26th - 30th September 2022,
Rennes,
Marc Verderi (LLR) & Alberto Ribon (CERN)

An “in person” meeting !

A successful meeting

- Being back as “in person” format meeting really made the meeting efficient !
 - Many new or continuing subjects were discussed in plenary and parallel sessions
 - And release 11.1 looks well on the way
 - We need to continue our efforts
 - Remote’s participants life was not always easy, but we thank them for their participation and patience; we made our best to minimize the inconveniences
- The program committee has insufflated ideas and energy to discuss the status and evolution of the Collaboration !
 - Thank you **Ben Morgan, Jonas Hahnfeld, Anna Zaborowska, Lorenzo Pezzotti, Pedro Arce**
 - And a **special thank to Anna** who devoted in addition much time to the surveys !
 - We got first results, but could not go through much details yet
 - This will start iterate at the Steering Board meeting
 - **And we will take special care of the communication on this !**

We have to follow-up !

- We had lots of discussion, quite much along the idea of **“improving the Collaboration spirit”**
 - We seek for improvement from a human point of view
 - But this will be beneficial to our developments too !
- **Improving the communication, we think, is the key**
 - We will have to work along this direction, or better said, **these directions**
- But we will need you too !
 - Volunteers for seminars will be very much welcomed !
 - Educational topics, but also new features, new trends
- **Let's take advantage of the momentum we created during this meeting to make these ideas coming to life !**

Again, a big thank to Laurent !

- Who undertook alone the role of local host !
