

## 4 NEu2012 Task 2: Existing European Neutrino Facilities

### 4.1 OPERA (A. Ereditato)

*Antonio could not be with us. The report will contain approx 1 page based on this info from him*

Dear Vittorio,  
thanks for the kind invitation. Unfortunately, due to the short notice, we could not accommodate a presentation for your event

. However, I can give you some information that you might desire forwarding to the attendance:

1) OPERA is in the process of completing the analysis of the full 2008-2009 statistics. Results will be disclosed in June.

2) Today we passed  $10^{19}$  pot for the 2011 run (for this year, **we expect to exceed the nominal integrated intensity** of  $4.5 \times 10^{19}$  pot).

3) **No plans yet for the future**, i.e. beyond the 2012 run.

Kind regards,  
Antonio
