

Review and Prospects of Higgs physics from ATLAS since the discovery

Monday 4 July 2022 10:45 (30 minutes)

Prof. Bill Murray was the ATLAS Higgs Convener in the run-up to Higgs discovery 2012 and then Physics Coordinator. More recently he has coordinated the ATLAS Tracking In Dense Environments group and is currently Higgs and Diboson Searches Convener. He also engages with future collider projects. The Warwick ATLAS Group, led by Prof. Bill Murray, have made substantial contributions to the ATLAS trigger and physics analysis and have held several coordination roles within the collaboration. A focus of the new appointment will be a substantial role in delivering aspects of Warwick's responsibilities for the ATLAS upgrade.

Presenter: MURRAY, Bill (University of Warwick (GB))
