

Mobility and Bike Infrastructure at Universities

Wednesday 7 September 2022 17:25 (15 minutes)

Mobility at universities does not only concern business trips but also the way to work as well as the own vehicle fleet. A survey was conducted at the University of Freiburg to determine the mobility behavior of employees. The evaluation shows a clear desire to strengthen the bicycle infrastructure. This is one of the many points of the mobility concept.

I understand that submitted abstracts will only be considered from registered participants.

Presenter: OPPERMANN, Sabrina
