

Climate impacts of particle physics: a Snowmass white paper

Tuesday 6 September 2022 17:24 (12 minutes)

The ongoing “Snowmass” process in the United States included a focus on community engagement issues within the field. The climate impacts of particle physics was identified as one such issue. I will discuss how the Snowmass paper came to be, and briefly discuss some parts of its content.

I understand that submitted abstracts will only be considered from registered participants.
