

Overview of Talk Guidelines

Duration

- 10 minute talk
- 5 min. Q&A

Focus

- Services your group provides the community
- Interfaces and dependencies on other service providers
- Joint Ventures
- Future Plans

Level

- Talks unfortunately must be brief but should be at a functional level to encourage ideas about cooperative systems
- Talks should assume the audience is familiar with most technical aspects of these types of services

]

Template

- Your talk should include a diagram of inputs and outputs to your information resource
 - We would like all resource providers to bring a rough sketch of your system as a black box, showing your inputs and outputs. We will circulate an example of this as time grows nearer, as well as other suggestions so that these presentations are as useful as possible.
