

Short Bio

August 5, 2022

My name is **Federico Ambrosino** and I was born in **Italy 22 years ago**. I have just completed my Master's studies at the **University of Oxford** where I graduated in **Mathematical and Theoretical Physics**.

Here at CERN, I am working for the **Department of Theoretical Physics** on 2 dimensional QCD, aiming to understand better the structure of confinement.

Next year I will be joining DESY in Hamburg for my PhD where I will be focusing on non-Perturbative aspects of (Supersymmetric) Gauge and String Theories.
