

Short Autobiography:

Hello, my name is Khalil. I was born and raised in Beirut, Lebanon. I just graduated with a bachelor's in Applied Physics and Mathematics from the Lebanese American University. I am starting my master's degree in Nanoptics and Nanophotonics at the University Technology of Troyes in Troyes, France next semester.

I am working on the CMS experiment with Fiber Bragg Grating sensors to build a monitoring system for Temperature and Strain measures at the Central beam pipe of the CMS detector.
