

Thank you for opening my self-introduction! XD

Introduction:

Hello everyone! My name is Zou Xiang, I am from Hong Kong, studying at The University of Hong Kong, and just finished my visiting year at The University of Oxford, I am a physicist, aiming to study for either Astrophysics or Quantum/Particle Physics for my post-graduate.

As a summer student for ATLAS experiment, I am working on some machine-learning algorithm for $t\bar{t}H$ channel detection, and I hope my talk is interesting, if you have any things to discuss, feel free to find me!

Apart from studying, I play drum sets, and I love badminton, ice hockey, skiing, etc... Really nice to meet you!

XD
