Physics learning promoting culture
and addressing societal issues

Contribution ID: 30

Type: **Symposium**

Cultural Understanding of Physics: Instruments and Methods

Thursday 6 July 2023 11:10 (1h 30m)

Although nowadays sciences are viewed by most people to be extremely important for society, their human, profound aspect –the one that allows touching, in a way similar to Art, the strings of the human soul –is still missing. Sciences are, in fact, deemed mainly for their utilitarian aspects. If we want science, and more specifically physics, to be truly considered cultural heritage of humanity in its most general sense, we must bring a deep, cultural vision of physics to all school levels, starting with university, highlighting connections and promoting synergies with other areas of human knowledge.

How would you like to present your contribution?

Live in Košice (time slot to be allotted based on the programme)

Target education level (primary)

Upper-secondary education

Target education level (secondary, optional)

University education

Authors: GILIBERTI, Marco (Università degli Studi di Milano); Prof. KARWASZ, Grzegorz (University Nicolaus Copernicus, Torun); LOVISETTI, Luisa (University of Milan, Department of Physics); ORGANTINI, Giovanni (Sapienza Università e INFN, Roma I (IT)); ROSI, Tommaso

Co-authors: ONORATO, Pasquale (University of Trento); TUFINO, Eugenio (University of Trento, Physics department); Prof. OSS, Stefano (University of Trento); SURACE, Graziano (Sapienza Università di Roma)

Presenters: GILIBERTI, Marco (Università degli Studi di Milano); Prof. KARWASZ, Grzegorz (University Nicolaus Copernicus, Torun); LOVISETTI, Luisa (University of Milan, Department of Physics); ORGANTINI, Giovanni (Sapienza Università e INFN, Roma I (IT)); ROSI, Tommaso

Session Classification: Symposium

Track Classification: Interdisciplinary approaches and physics in STEM education
