Students' hybrid perspectives about wave function and quantum measurement: A cross-national study

Thursday 6 July 2023 13:40 (20 minutes)

In this research, we focus on undergraduate physics students' hybrid views in two specific cross-cutting concepts in quantum physics, namely, wave function and measurement, and examined them in an international context, Italy and Türkiye. Our results indicate a weak association with the country of origin, whereas hybrid views are independent of the targeted concepts.

How would you like to present your contribution?

Live in Košice (time slot to be allotted based on the programme)

Target education level (primary)

University education

Target education level (secondary, optional)

Primary authors: DIDIŞ KÖRHASAN, Nilüfer; TESTA, Italo; MARZOLI, Irene; GIULIANA, Giovanni

Presenter: TESTA, Italo

Session Classification: Contemporary and modern physics

Track Classification: Contemporary physics and modern physics at school
