and addressing societal issues

Contribution ID: 190

Type: **Symposium**

New perspective in Physics education research and teaching & learning Physics in Latin-American Countries

Wednesday 5 July 2023 16:40 (1h 30m)

This symposium addresses four aspects of Physics education research from Latin American perspective. Research outcomes, experiences and projects that are representative from the diverse lines of work in this multicultural region are presented here. The use of digital technologies, the critical challenges for the social and historical curricular design, the promotion of community participation and some training experiences of in-service teachers are presented and reflected in this work. In this way, this symposium will offer a clear vision of the efforts linked to the research and development of Physics education which are being made in this region of the world.

How would you like to present your contribution?

Hybrid from my own country (later in the conference day, best for Americas ...)

Target education level (primary)

In-service teacher education

Target education level (secondary, optional)

Primary authors: DAMIÁN RODRIGUEZ-FERNÁNDEZ, Carlos (Departaments of Física e Ciències da Terra, and Biología, Universidade da Coruña, Spain); MATTOS, Cristiano (University of São Paulo); LORENZO, Gabi

Presenters: DAMIÁN RODRIGUEZ-FERNÁNDEZ, Carlos (Departaments of Física e Ciències da Terra, and Biología, Universidade da Coruña, Spain); MATTOS, Cristiano (University of São Paulo)

Session Classification: Symposium_hybrid

Track Classification: Physics teacher education and professional learning communities
