Contribution ID: 204

Supporting physics teachers in the implementation of innovative teaching methods and inspiring learning environments

Tuesday 4 July 2023 14:00 (20 minutes)

Type: Oral presentation

In this paper we focus on education aimed at developing students' skills and competencies by building scientific literacy, which requires teachers to implement innovative teaching methods. Digital technologies and the wide availability of information make it possible to combine formal education with self-study at home. We strive for teachers to gain a personal conviction in the suitability and effectiveness of blended learning and to gain confidence in its implementation. We present a mapping of the current state of teachers' attitudes towards the introduction of innovative teaching methods and the needs for their connection to the learning environment.

How would you like to present your contribution?

Live in Košice (time slot to be allotted based on the programme)

Target education level (primary)

In-service teacher education

Target education level (secondary, optional)

Primary authors: JUHASOVA, Antonia (Falutly of Science, Pavol Jozef Safarik University in Kosice); KIRES, Marian (Falutly of Science, Pavol Jozef Safarik University in Kosice)

Presenter: KIRES, Marian (Falutly of Science, Pavol Jozef Safarik University in Kosice)

Session Classification: Physics teacher education

Track Classification: Physics teacher education and professional learning communities
